

Qore::SQL::AbstractDatasource

```
classDiagram
    class QoreSQLAbstractDatasource["Qore::SQL::AbstractDatasource"]
    class QoreSQLDatasource["Qore::SQL::Datasource"]
    class QoreSQLDatasourcePool["Qore::SQL::DatasourcePool"]
    QoreSQLAbstractDatasource <|-- QoreSQLDatasource
    QoreSQLAbstractDatasource <|-- QoreSQLDatasourcePool
```

The diagram illustrates a class hierarchy. At the top is the class `Qore::SQL::AbstractDatasource`, which is shaded gray. Below it are two subclasses: `Qore::SQL::Datasource` on the left and `Qore::SQL::DatasourcePool` on the right. Both subclasses are enclosed in white boxes with black borders. Blue arrows point from each subclass box up to the `AbstractDatasource` box, indicating that both `Qore::SQL::Datasource` and `Qore::SQL::DatasourcePool` inherit from `Qore::SQL::AbstractDatasource`.
